Departure Detection

Code Alert[®] Wandering Management Solutions allow for resident movement throughout the facility, while assuring residents who wander the protection they need by monitoring elopements before they occur.

Code Alert Wandering Management is right-sized for your facility ranging from a simple door alarm to a Windows based touchscreen control system. Code Alert provides resident protection, data documentation, and safety solutions to over 10,000 facilities ranging in size from one-door Adult Day Centers to multi-building Senior Living Communities.

Code Alert[®] Perimeter Alarm Security

The Code Alert Wandering Management System provides 24-hour security for complete monitoring of exits. Each exit can be monitored based on security needs, traffic, and resident population. Easily expandable.

Code Alert[®] Transmitter Based System

Using radio frequency technology, the Code Alert Model 70 door controller uses CodeWatch™ Transmitters and near-door Receivers to detect a residents' presence and a Control Unit that issues the alarm.

Code Alert[®] Resident Identification

The Code Alert Model 80 door controller offers the ability to identify the resident by name and location. Mobile staff can be alerted of a resident attempting to exit a monitored zone via pagers, walkie-talkies, or QuickLook™ displays. In addition, extensive "real-time" managerial resident reports may be generated to identify resident patterns and incidents as well as staff response time.

Code Alert[®] Wireless Call Solution

Code Alert Wandering Management Solutions can be integrated with Wireless Call and various other systems, including fire and smoke alarm systems, and phone systems such as Cisco, Avaya, and Spectralink.

Code Alert [®] Wandering Management Systems

System Options & Accessories

- **Easy-to-Use Software** - Large bright colored icons make it easy to identify alert.
- **Staff Alert Panel** - Simple audible and visual display of an Alert, available in 8 or 32-zone models.
- **QuickLook™ Displays** - LED marquee displays provide notification of Alerts in hallways or remote areas without the need for an additional computer.
- **CodeLock™** - Automatically locks door when a resident with a CodeWatch is near. Fully compliant with NFPA-101.

Code Alert[®] Integrated Care Management

Code Alert Systems can be easily upgraded to a comprehensive monitoring platform that offers wireless fully supervised systems. RF Technologies offers a wireless network that provides wandering, nurse call, fall, and device monitoring solutions for senior living communities.

24/7 Technical Support and Services

The RF Technologies team works with your facility throughout the life cycle of your systems, reducing risk and liability while maintaining the integrity of your systems at a lower cost. We are proud to offer a world-class service desk 24/7, with factory trained technicians ready to troubleshoot and answer your questions.

- Service Level Agreements
- No Charge Technical Phone Support
- Factory Trained and Certified Installer Network
- Online Technical and User Training Modules

About RF Technologies

RF Technologies is a leading provider of comprehensive, integrated RFID Safety and Security systems, WiFi RTLS systems, and healthcare enterprise solutions. With an installed base of more than 10,000 systems worldwide, RF Technologies specializes in state-of-the-art healthcare solutions for senior care facilities and hospitals, including Safe Place® Infant Security and Emergency Department Solutions, Code Alert® Wandering Management and Wireless Nurse Call, Sensatec® Fall Management Solutions, Help Alert® Emergency Call and PinPoint® RTLS Solutions. The company is credited with inventing the first RFID infant security system, which was designed and developed by nurse clinicians. It was the first in the industry to invent Peer-to-Peer WiFi RTLS, and to offer Remote Monitoring, RF Consulting and 24/7 technical support by RF Technologies' staff specialists and a nationwide service management team.
