Dear Jason,

Thanks to your generous support, we raised an extraordinary **\$140,000** at this year's Starlight Gala! \$70,000 of those funds was dedicated to the JDRF Canadian Clinical Trial Network, and will be matched with \$140,000 of Government funds, raising the impact of this evening to over \$280,000 of funding for diabetes research. What a wonderful way for us to capture the theme of this year's Gala... *'Celebrating our Successes'*. And none of this would have been possible without the amazing support of each of you - our corporate community, individual donors, sponsors, families affected by diabetes, guests and volunteers - who share JDRF's belief and dedication in finding a cure for Type 1 Diabetes.

JDRF is the world's largest charitable funder and advocate of Type 1 Diabetes research. Through its research leadership, collaborations between top researchers in diverse fields are possible, with the focus on finding cures for Type 1 Diabetes and its complications.

Many advances in diabetes research, including the development of the artificial pancreas - an automated system that will disperse insulin based on real-time changes in blood sugar levels - are leading us closer to a cure. Your support of this year's Starlight Gala means that you are part of this success, and are helping to accelerate the progress of scientific research into tangible benefits for those living with Type 1 Diabetes, and those who will be diagnosed in the future.

On behalf of the Gala Committee and all the families touched with Type 1 Diabetes, we sincerely thank you for your generous support of JDRF. Together we can cure diabetes forever!

Wishing you all the best for a happy and healthy holiday season with your family and friends. We hope to see you at next year's Starlight Gala!

Sincerely,

Chair, JDRF Starlight Gala 2010
